Aurora Systems Ltd. · Quarterly Report, Q1

1. Executive summary
Revenue reached 2.4M EUR, up 18% year over year, driven mainly by the subscription tier (61% of total revenue). Gross margin held at 72%.
Operating expenses grew 11%, below the 14% guided ceiling.

2. Key figures
Revenue ..... 2,400,000 EUR (+18% YoY)
Gross margin 72%
New customers 312
Churn ..... 2.1% (down from 2.8%)
Cash position ..... 5.9M EUR

3. Regional performance
EMEA grew 22%, Americas 15%, APAC 31% from a smaller base. APAC is now the third-largest market and is expected to pass EMEA within two years.

4. Product developments
The analytics dashboard left beta in February and already has 4,100 weekly active users. The mobile app rebuild is planned for Q3.

5. Risks
A single hosting provider concentrates 80% of production workloads; the board asked for a multi-cloud feasibility study by the end of Q2.
Currency exposure in APAC is hedged only for 40% of projected revenue.

6. Outlook
For Q2 management guides revenue of 2.5-2.6M EUR and expects hiring in engineering to continue at a pace of four to five offers per month.
